SPRING AS A RENEWAL

On March 14, the Headquarter of West Dala celebrated the holiday of spring and renewal — Amal meiramy. Employees gathered to honor ancient traditions, strengthen corporate spirit and spend the day in an atmosphere of unity and joy. The celebration began with the traditional “korysu” ritual — a symbolic handshake and exchange of warm wishes. Colleagues congratulated each other on the holiday, wishing health, well-being and success in work. Today, Amal Meiramy is gaining popularity among young people, which speaks to the importance of preserving cultural roots. This holiday reminds us of the values of good neighborliness, mutual respect, and spiritual connection with ancestors. It teaches us to preserve traditions and pass them on to future generations.

Amal meiramy is the harbinger of the brightest spring holiday Nauryz. In its

honor, on March 20, in the office and at all facilities of the West Dala company, the working day began with boursaks, nauryz kozhe and other treats on the

festive dastarkhan. Everyone was able to feel the spirit of Nauryz, enjoying the atmosphere of warmth and unity. *(Continued on page 6).*

ASSOCIATIONS

LOCAL CONTENT DEVELOPMENT

Since this year, West Dala has been a member of the Oil and Gas Council of Kazakhstan "PetroCouncil". This association is engaged in the development of local content in the oil and gas industry of Kazakhstan. The mission of "PetroCouncil" is to unite and support efforts to ensure fair and successful development of the oil and

gas market. Among the implemented projects of the association: training in the basics of entrepreneurship for unemployed residents of the Zhylyoi district; seminars on procurement and prequalification with large operators TCO, NCOC, KPO; development of a memo on prequalification and procurement of TCO and NCOC for SMEs

and other significant initiatives. For West Dala LLP, the membership in PetroCouncil is not only an opportunity to receive expert support, but also a platform for interaction with key oil and gas market players, operators and stakeholders in the region.

TENGIZ

OUR EXPERIENCE AT 3GP

At the end of January this year, crude oil treatment began at the new Third Generation Plant (TGP) at the Tengiz field. It should be noted that Kazakhstani companies took an active part in the preparation of such a large-scale project.

At the peak of construction work, approximately 90,000 jobs were created at the FGP. West Dala, as a TCO contractor, has been involved in providing services during the construction of 3GP since 2019. Specifically, for the implementation of this project, our company established Tengiz WMF as a support base for the provision of waste management services at the Future Growth Project and

Wellhead Pressure Management Project (FGP/WPMP).

For the new facility, in order to ensure high-quality contract work, supersuckers, water trucks, bunker trucks, vacuum trucks, garbage trucks, a truck crane, manipulators, containers for all types of waste of various sizes, 6 m and 12 m toilet complexes, as well as single-cabin all-season bio-toilets were purchased.

During the construction of the third-generation plant, our cooperation with TCO expanded, which allowed the new Prorva facility to be commissioned in 2021. This complex became West Dala's base in Tengiz for the provision of services for the processing of

construction and dismantling waste generated at TCO production sites. It is important to note that TCO makes a significant contribution to the formation of high-quality partnership cooperation, and West Dala employees strive to maintain high TCO standards in all production areas. This is reflected in high CHESM audit scores (health, safety and environment) and incentives for work from the Customer.

We are grateful for our experience of working on the construction of the ZTP and intend to continue working with TCO at a high level in the implementation of other projects.

SAFETY AND LABOR PROTECTION

PROACTIVE APPROACH TO SAFETY

Attention to detail and a proactive approach to safety help prevent risks and create reliable working conditions at West Dala facilities. It is this attitude to safety issues that helped the Bautino Project Team take the honorable 3rd place among all NCOC N.V. facilities (Kashagan, Eskene West, Bautino) for the best positive Safer! The positive Safer card was compiled based on the knowledge gained at the forum on load securing safety for drivers. The initiator of the Safer card was the OSH engineer Erbolat Izimov, and the participant was the driver Asylbek Zhumabayev. Their contribution to improving safety was noted with letters of encouragement and gifts from NCOC N.V. We are proud of our Bautino Project Team and thank you for your dedication to the safety culture!

SILVER MEDAL FOR CONTRIBUTION TO THE FGP PROJECT

West Dala Awarded Silver Medal for Contribution to the FGP Project On January 31, 2025, West Dala successfully completed its work on the FGP Project at Tengiz. Our Partner, TengizchevroilLLP, organized a formal gathering to mark the project's completion and honored outstanding contractors. Among the top performers was the West Dala Team at Tengiz, which was awarded a silver

medal. In the Certificate of Appreciation signed by Richard Morgan, FGP/WPMP Talent Manager, it was noted that this award was given for significant impact and impeccable service. Our team worked on the FGP Project for five years, from 2019 to 2025, providing rental and maintenance services for mobile toilet facilities, water supply, territory cleaning, and domestic wastewater disposal. Additionally, the company rented and serviced over 2,000 bunkers, Euro containers, and standard

containers across all FGP Project sites, including the 3GP plant, 3GI Gasaring, Construction Compound, and Orken Village. We take pride in the fact that there were no incidents throughout our work on the project, and our services consistently met the highest standards. This achievement belongs to the entire West Dala Team! We sincerely thank you for your professionalism, responsibility and contribution to the successful implementation of the project!

SAFETY AND LABOR PROTECTION

CONGRATULATIONS TO OUR PARTNER!

West Dala congratulates its partner on an important achievement! Since 2016, West Dala has been cooperating with NCOG N.V. contractor - KMG Systems & Services LLP. In January, our partner held a gala event in honor of an impressive achievement - 4,000 days without lost working time and occupational safety incidents. The event recognized the best partners who contributed to this achievement.

The meeting emphasized that the result of 4,000 days without lost working time and occupational safety incidents was made possible by the constant attention to the work culture and compliance with safety standards. Congratulations to KMG Systems & Services LLP and wish them further success!

A recognition letter from West Dala was received by Erbolat Zhanbirov, Senior Dispatcher of the Dispatch Service. Personal thanks were also given to the driver Beibit Uryntayev and the assistant driver Nurtas Kuzhegaliev for their responsible attitude to safety issues and exemplary work.

EARTH HOUR

ACTION AS A CARE FOR THE FUTURE

On March 22 of this year, West Dala joined the largest environmental campaign "Earth Hour", which is held worldwide on the initiative of the World Wildlife Fund (WWF). As a sign of its support, external and internal lighting sources were turned off for one hour, from 20.30 to 21.30, at WMF, Integrated

Landfill, Tengiz, Uzen, Koshanai. The goal of the campaign is to attract the widest possible attention of the world community to the problem of climate change on Earth, the importance of caring for nature and rational use of resources, and to show support for the idea of the need for joint action in

solving environmental problems. This initiative is not just a symbolic gesture, but a reminder to each of us that caring for the future of the planet starts with small things. We thank everyone who joined the campaign and shares the values of environmental responsibility!

EVENT

KAZNEFTEGAZSERVICE-2025 CONFERENCE

West Dala LLP took part in the XII annual Kazneftegazservice-2025 conference in Atyrau. This is a key event in the oilfield services industry of Kazakhstan, organized by KazService Union of Oilfield

Service Companies. During the conference we discussed the issues of localization, expanding the participation of Kazakhstani companies in major projects, developing the petrochemical

industry, optimizing procurement procedures and supporting local businesses. Among the key speakers were representatives of TCO, NCOC, KPO, KKO, KMG PetroChem, Silleno, as well as international partners from Qatar. Viktor Kisykov, Head of West Dala projects in Tengiz: "For us, the main topics were the localization of production of our partners from among oil and gas companies in the Atyrau region and the beginning of the development of a polyethylene production project. Also, at all the conference platforms, they talked about increasing the Kazakhstani content in oil and gas projects, which is certainly important for all participants of the KazService Association. The Kazneftegazservice-2025 conference became a platform for strengthening business ties and discussing the prospects for partnership with industry leaders.

FORUM

ECO-PARTNERSHIP

On February 20 this year, the Eco-Partnership forum was held, organized by KPO B.V. The event discussed the main environmental challenges, summing up the results of 2024 and opportunities for further development of cooperation in environmental protection. Anuar Mukiyev, West Dala Regional Manager for West Kazakhstan Region - Forum speakers focused the attention of business partners on

important points in the development of regulatory documents, on the timeliness of detection and notification in cases of changes in the volume and types of work. The meeting also allowed establishing contacts with all the Customer participants who exercise control over the environment in the field. Overall, the forum left a lot of positive impressions and was useful for West Dala, as a partner of KPO B.V.

MISSION

OPEN ECOLOGY LESSON

In February, our colleagues Ainagul Sagiyeva and Assyl Temirtasova visited the 4th "L" class at the Atyrau school-lyceum BINOM SCHOOL named after D. Kunayev to conduct an open lesson on

ecology. They faced a difficult task: to captivate schoolchildren with the topic of the significance of waste and the importance of careful treatment of natural resources in 45 minutes. Our colleagues coped with this mission perfectly!

In a playful way, students learned how plastic and used tires are recycled, what waste is hazardous, why the Environmental Code is needed, and much more.

"It was a pleasant discovery for us that the children are well aware of the importance of waste sorting. This means that parents pay attention to

environmental education," the colleagues noted. For their activity and curiosity, the young ecologists were awarded medals "Young Defender of Nature" and sweet gifts from West Dala LLP. We thank the administration of the BINOM SCHOOL Lyceum named after D. Kunayev and the teacher Gulbanu Adilova for their cooperation. We are confident that such lessons form a responsible attitude towards the environment in children from an early age. West Dala LLP will continue to implement initiatives aimed at environmental education of the younger generation.

CHARITY

IGILIK SEBETI

West Dala cooperates with many organizations to provide charity. One of them is the Atyrau city branch of the NGO "Atyrau regional society of persons with disabilities". According to their list, our colleagues visited six families to deliver targeted assistance. On behalf of the company, the campaign "Igilik sebeti" ("Basket of Good") was organized. "We collected one large food

basket with bread and dairy products, sweets, flour, fruits, vegetables and chicken meat. Such a basket is our contribution to the well-being of Atyrau residents," says Aigul Daniyalova, the coordinator of the campaign. We believe that good deeds unite people and make our world a little better!

WEST DALA FOR A GREEN CITY!

Last Sunday, March 30, West Dala volunteers took part in an environmental campaign organized by the public foundation “Atameken Eco” in the Otbasy Park. “Together with other dedicated activists, our colleagues planted seedlings, painted trees, and helped make the park greener,” says Kuangali Yelubayev, a regular participant

in clean-up events and initiatives from West Dala. Our volunteers always respond to such environmental calls, understanding that the well-being of our beloved city depends on the residents of Atyrau themselves. We thank all participants of the campaign for their contribution to ecology and a cleaner future!

SPRING AS A RENEWAL

Continuation.

We congratulate everyone on their favorite holiday, when together with the first warmth comes real spring, and

with-it renewal and hope. Let Nauryz bring everyone joy, harmony and luck in the new year!
